### 15. Use this space for any comments you may have about the course, the instructor, readings, etc.

[681]

**Student 8:** The professor was very motivational; she tried to motivate each individual taking this course. I wanted to thank her for broadening my perspective in nursing as well as my personal life

**Student 5:** This class is very interactive, required hard work yet enjoyable.

**Student 4:** Dr. Acquaviva was extremely responsive with discussion boards and when I had a question over email. I felt like she was not just overseeing this course, but actively involved in our learning. I appreciated her encouraging and constructive feedback on discussions and papers. I also enjoyed how each assignment built on the last. This allowed us to focus on the process, not just on the subject matter we chose.

**Student 11:** thoroughly enjoyed this course- opened up my eyes to the many different populations in very different community settings. Instructor was great

**Student 1:** Kim was a great instructor, she was helpful and encouraged open dialog among her students. Best instructor I have had so far at GW

**Student 13:** I was not incredibly interested in the subject prior to this course, but Professor Kim made it interesting and enjoyable! I really enjoyed this class and learned so much.

**Student 12:** Very eager to help and educate her students. Very accessible and responds quickly to emails.

## Department-Specific Questions

### 16. Expected grade in the course

**24. Please describe the most positive aspect(s) of this course. What should stay the same? (If multiple instructors are responsible for implementing this course, identify the instructor by name when applicable).**

[2314]

**Student 12:** The discussion boards correlated to our papers, and it was nice to get feedback on the posts so we could write a stronger paper.

**Student 11:** great discussion boards- our teacher made it like a true discussion for our feelings to be expressed. Instructor was great-very supportive and available

**Student 10:** 1) Very interactive course with discussion board that facilitated learning through active interaction with course instructor and the classmates. 2)Course instructor very knowledgeable, helpful, and available. Constructive feedback were provided in timely manner that encouraged me to perform better.I felt supported during this course and I really enjoyed this course.

**Student 2:** Our instructor was excellent.

**Student 8:** The assignments given in this course were eye opening and challenged us not only with the work but also how we see the world. This course was overall enjoyable.

**Student 7:** I enjoyed having Professor Acquaviva. She was enthusiastic and encouraging.

**Student 6:** Everything within the course was great. The instructor was excellent.

**Student 5:** The course requires a lot, however, an instructor like Kim made the journey less stressful by addressing students concerns in a timely manner. Questions were answered straight forward and not in a vague way. I wish all the other instructors have the understanding that we here to learn and if we ask questions, it is because we don't understand.

**Student 4:** Dr. Acquaviva's timely responses to questions and papers was very positive. Also, I enjoyed how she responded to every student's discussions and provided follow-up questions. I think the sequential assignments (chronic disease, intervention/evaluation, presentation) should stay the same.

**Student 13:** I've never had an instructor make immediate changes based on feedback from students. This happened on numerous occasions and made the course better and more interactive. I really appreciate Professor Kim's quick responses and constant feedback and interaction with the class. I felt like I knew her by the end of it! I really liked how the various papers built on one another as well as the discussion boards.

**Student 9:** I liked that the papers were tied together. It really helped to see the progression and understanding of course material. The instructor, Kim, was great !!

**25. Which aspect(s) of the course need(s) the greatest improvement and what recommendations do you have for improvement? (If multiple instructors are responsible for implementing this course, identify the instructor by name when applicable).** [2315]

**Student 6:** none

**Student 5:** I don't think we need the text books.

**Student 4:** n/a

**Student 3:** The only thing I struggled with during the semester was the papers. The descriptions/rubrics were vague and I was always concerned I was missing major points. It would be helpful to have more detailed instructions on these assignments

**Student 2:** Our primary textbook for the course was "okay." I am not sure it contributed much to the course.

**Student 13:** I understand that negative feedback is more so what you wish to receive in order to improve, but I loved this class! I cannot think of any changes.

**Student 11:** NA

**Student 10:** N/A

**Student 9:** I think the paper instructions were very vague, as an online course I think it would be helpful if assignment instructions were clearer.

**Student 7:** Providing example papers so we know what is expected was helpful.

<sup>1</sup> - Valid Percent: Excludes missing, not applicable, and/or blank responses.

\*\* - Mean of student responses: The mean is the arithmetic average of a set of scores found by summing the scores from each student and dividing that sum by the number of students who answered with a valid answer to this question.

\*\*\* - Mean of courses: The mean is the arithmetic average of a set of scores found by summing the mean from each course and dividing that sum by the number of courses that asked this question. This can be viewed as the mean of means of courses.

\*\*\*\* - Standard deviation of student responses: A measure of the variability or dispersion in a set of scores that provides an indication of the average amount by which the student scores deviate from the student mean of the distribution

\*\*\*\*\* - Standard deviation of courses: A measure of the variability or dispersion in a set of scores (mean of each course) that provides an indication of the average amount by which each of the course mean deviates from the mean of the distribution of all course means. This is the standard deviation that you should refer to if you are comparing one course to all the courses.
